Surrogacy

We offer a full range of surrogacy treatments, including gestational IUI and IVF surrogacy using your eggs and traditional surrogacy using your surrogate's own eggs, or donor eggs. For traditional surrogacy treatments please contact us to discuss your specific requirements and we would be happy to help.

Gestational IVF surrogacy using your eggs

Following hormonal management and scanning for you and your surrogate, your eggs are collected and fertilised by sperm in our laboratory. Embryos are then placed in the uterus of your surrogate host.

The package includes:

nurse consultations for you and your surrogate

injection training

all ultrasound monitoring scans for you and your surrogate

sedation fee for egg collection

egg collection

sperm preparation

laboratory fertilisation of eggs and development of embryo

embryo transfer and HFEA fee

pregnancy blood test

free follow-up consultation, if booked within three month of pregnancy test

Additional treatments will be tailored to your personal needs. They may include registration fee for donor programme, consultations, implications counselling, screening tests, hormonal monitoring tests, your medication, donor sperm, donor sperm HFEA fee, ICSI, IMSI, blastocyst culture, assisted hatching, egg or embryo freezing and first year's storage, pregnancy test and scan.

Please note any additional treatments will incur additional costs.

£8300

Egg donation

We offer a full range of egg donation treatments. You can choose to use an altruistic egg donor through our UK and overseas egg donation programmes, or a donor who is known to you. For known and overseas egg donation please contact us to discuss your specific requirements and we would be happy to put a package together for you.

<p>Egg donation using altruistic UK donor</p> <p>We will match you with an anonymous, UK-based donor from our egg donation programme. Following hormonal stimulation and scanning for you and your egg donor, your donor's eggs are collected and fertilised by sperm in our laboratory. Embryos are then placed in your womb.</p> <p>The package includes:</p> <ul style="list-style-type: none"> matching you with a suitable egg donor payment of donor's fee donor's consultation and blood screening tests donor's medication all ultrasound monitoring scans for you and your donor nurse consultation and injection training for you and your donor sedation fee for donor's egg collection donor's egg collection sperm preparation laboratory fertilisation of eggs and development of embryo embryo transfer HFEA fee pregnancy blood test follow-up consultation, if booked within three month of pregnancy test <p><i>Additional treatments will be tailored to your personal needs. They may include registration fee for donor programme, consultations, implications counselling, screening tests, hormonal monitoring tests, your medication, donor sperm, donor sperm HFEA fee, ICSI, IMSI, blastocyst culture, assisted hatching, egg or embryo freezing and first year's storage, pregnancy test and scan.</i></p> <p><i>Please note any additional treatments will incur additional costs.</i></p>	<p>£9500</p>
<p>Registration fee for altruistic UK donor programme</p>	<p>£350</p>

Donor sperm

---	--------------------

Additional treatments and services

Additional tests, investigations and treatments may be used to support your fertility treatment cycle

Intralipid Infusion Therapy

Intralipid infusion (per episode) <i>Intralipid infusion therapy can help to stabilise your immune system</i>	£300
---	-------------

Freezing and storage (in addition to treatment)

Embryo freezing May be chosen in addition to your fertility treatment cycle. freezing by vitrification first year's storage	£900
Egg freezing May be chosen in addition to your fertility treatment cycle. freezing by vitrification first year's storage	£900
Semen freezing May be chosen in addition to your fertility treatment cycle or as standalone freezing for future use. freezing first year's storage	£600
Annual storage fee for eggs, embryos and semen	£300
UK transfer of gametes and embryos	£200
International transfer of gametes and embryos	£320

Advanced laboratory procedures

Blastocyst culture Blastocyst is the stage an embryo reaches at day five. Leaving embryos to grow to blastocyst stage for a few extra days can significantly increase success rates so, where possible, our embryologists will recommend this.	£575
Assisted hatching Where beneficial, embryologist may make a small hole in the shell of an embryo to aid hatching and improve chance of implantation.	£500
Time-lapse Imaging Time-lapse technology allows us to take images of embryos as they develop, without having to open the incubator to check them. It helps us to select high quality embryos	£750

Genetic screening

We conduct a full range of genetic screening and diagnosis on embryos, eggs and sperm, which can help to ensure we are using those that are as healthy as possible and allow us to identify any potential problems. If you have had previous miscarriages, more than two unexplained IVF failures, are of advanced maternal age or have a family history of genetic disorders this may be an option you'd like to consider.

Some of our genetic screening services include:

PGS by array-CGH on all chromosomes	
biopsy of embryos 8 samples	£3200
additional samples (each)	£200

Chromosome rearrangements using high resolution array-CGH	
biopsy of embryos 1 to 8 samples	£3350
additional samples (each)	£250

PGD test for single gene disorder	
biopsy of embryos 1 to 8 samples	£5200

Advanced theatre procedures

Endometrial preparation and scratching Saline hystero-graphy and gentle scratching of the lining of your womb before your fertility treatment cycle.	£410
Endometrial Preparation only	£310
Endometrial Scratch only	£310
Surgical sperm retrieval (PESA and TESA) Sperm are surgically extracted from the epididymis and/or testicles	£1595
Sedation May be chosen in addition to your IUI cycle or embryo transfer.	£375

Tests, scans and investigations

Hormonal monitoring blood test	£100
Ultrasound scan	£175
HyCosy Sonohysterography and HyCosy	£450
Anti Mullerian Hormone (AMH) blood test	£100
Female fertility hormonal blood test	£200
Chlamydia test	£100
Female infection screen HIV 1 and 2: anti-HIV-1-2, Hep B: HBs Ag/anti-HBc-Ab, Hep C: anti-HCV-Ab, FBC and RubG	£210
Male infection screen HIV 1 and 2: anti-HIV-1-2, Hep B: HBs Ag/anti-HBc-Ab, Hep C: anti-HCV-Ab	£200
Pregnancy test Blood test for the pregnancy hormone Beta Hcg	£40
Pregnancy scan	£175
Semen assessment with sperm preparation for treatment Includes analysis, report and sperm preparation for use in a fertility treatment cycle	£180

Out-patient services

We can provide any of our blood tests, scans, investigations and prescriptions for people who are not having fertility treatment with us.

Ultrasound scan and report	£220
Sonohysterography and HyCosy including report	£475
Prescription Initial consultation required	£215
Pregnancy scan with printed image	£175
Venepuncture fee	£45
Nurse consultation	£50
Outpatient fertility cycle administration fee Administration fee for management of out-patient fertility cycle monitoring.	£250

Gonal-F (300 iu)	£135
Gonal-F (450 iu)	£195
Gonal-F (900 iu)	£385
Letrozole (2.5 mg) 5 tablets	£38
Ovitrelle (6500 iu)	£30
Pergoveris	£60
Progynova (28 tablets)	£30
Prostap	£215

Notes

These figures are intended as a guide and are subject to change without notice

- *Consultations: If you are having a consultation, a £50 deposit is required at the point of booking. This is refundable if more than two working day advance notice of cancellation is given. The remaining balance will be taken on the day you attend the clinic.*
- *Fertility treatment cycles: In order for your fertility treatment cycle to begin, payment must be received by the time of your first monitoring scan.*
- *Out-patient services: If you are visiting us for any other out-patient treatment you will need to pay for your care prior to or on the day you attend the clinic.*
- *Storage of eggs, embryos and semen: All storage costs need to be paid upfront and in advance of storage.*
- *We accept cash, bank transfers, banker drafts and credit and debit cards. We regret that we are unable to accept personal cheques as a form of payment, except for annual storage payments.*
- *All prices are in pounds sterling. This price list is effective from May 2014. It serves information purposes and should not be treated as a formal trade offer.*
